Conversion Experts!

Why Convert Your Garage?

COST

Garage conversions can save over \$100,000 compared to a home extension whilst still providing the room needed for your family. Some projects do not require council approval which also saves time and money, not to mention the headache.

TIME

We don't talk in years or months, we talk weeks when scheduling our projects. With an average of 5 weeks, you can be construction free in no time! Plus all of our work takes place in the garage leaving your home free from construction materials and dust.

ADAPTABLE

Some clients prefer to have their garage back after their rooms are no longer needed such as when their children grow up and move out. We can build in preparation that makes removing the rooms in the future easy.

VALUE

Adding new rooms to your home can increase the value of your home or even be rented out for extra income. Garage to Rooms work with investors to help add value to each property.
