**Building or
landscaping?**

More Kiwis are looking to enjoy their new build or
outdoor living space instead of maintaining it.

SmartGrass™ is a new type of artificial grass that focuses on
being realistic, durable and environmentally friendly.

SMARTGRASS

Astroturf, reimagined

What is SmartGrass?

SmartGrass™ is synthetic grass reimagined and designed for living. It's ultra low maintenance, real looking, eco-friendly and pet and child friendly.

SmartGrass™ is constructed of up to six different natural coloured blades, up to 40mm in height, giving a luxurious look and feel (even with the brown bits!).

SmartGrass™ is not like the old 'astroturf' - in fact you've probably seen SmartGrass™ without realising, because it appears so real. You'll become the envy of the neighbourhood with your evergreen, immaculate lawn!

Why Kiwis love SmartGrass

Looks great all year round

Less maintenance time

Pet and child friendly

Get more out of your area

Created for kiwi conditions

So many places to use it

Increase property value

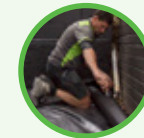

Up to 10 year warranty

The SmartGrass 5 step installation process:

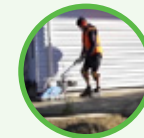

Step 1 - Excavation

The existing lawn, garden or stone is removed, typically to 70-100mm below the finished level. This leaves the hard ground below exposed.

Step 2 - Stabilisation and drainage

The ground is compacted. A geocloth is laid to prevent undulation of the lawn as well as weeds. Drainage coil is laid in poor drainage areas.

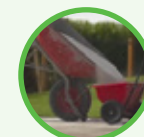

Step 3 - Base construction

A timber or concrete edge is installed. The base is built up to the finished level using crushed rock. This gets compacted and laser levelled.

Step 4 - Turf installation

SmartGrass™ is laid on the crushed rock surface. This involves cutting and joining the rolls of turf, then fastening it to the boxing and ground.

Step 5 - Infill and grooming

The turf is groomed and a layer of sand is spread on top. The sand hides below the surface of the pile and helps the blades stand up.

How to get SmartGrass at your place

1

Give us a call or email with your requirements

2

We'll visit the site to measure up, or we can quote off your landscape plan

3

We provide a quote and samples for you

Suitable for dogs?	✓		
Suitable for playing?	✓	✓	
Natural looking?	✓	✓	

I am in love with my new lawn, it has transformed my back garden and looks amazing. The dog is very happy to have some grass as well. I would totally recommend SmartGrass to anyone.
